

Christine Kalil

Superintendent, Asset Management
QNS&L and Central Services

After graduating with a bachelor's degree in mechanical engineering from Concordia University in Montreal, Quebec, Christine Kalil began working for the Iron Ore Company of Canada in Sept-Îles, where she has since filled various roles within the Asset Management department.

In her current role, Christine manages a team of planners and engineers for the Iron Ore Company of Canada's railway QNS&L (Quebec North Shore & Labrador) and maintenance shops as Asset

Management Superintendent. She specializes in asset life cycle management, maintenance planning work management, reliability centered maintenance and root cause analysis. Christine loves working with operators, maintainers, technical experts, and engineers as a team to solve complex issues.

Christine is passionate about getting women involved in the rail, mining and engineering sectors, and loves mentoring young interns in these fields to help them recognize their future potential. Christine has also helped to develop IOC's new graduate development program for reliability and maintenance engineers.

In her spare time, Christine loves to travel, swim, and spend time with her husband and two young boys.
